PROFESSIONAL SUMMARY

Results-driven **Software Engineer** (B.Tech, NIT Durgapur) with **hands-on experience** in production engineering. Expert in **backend microservices**, **REST API design**, and **full-stack web development** using **JavaScript / TypeScript, Python, React.js**, and **Node.js**. Delivered **99.2% uptime**, **35% latency reduction**, and **zero recurring P1 incidents** in Agile teams. Experienced across the full **SDLC** — design, implementation, code review, testing, **CI/CD**, and documentation. Growing in **C#** and **.NET**. Open to relocation pan-India.

TECHNICAL SKILLS

Languages: **JavaScript / TypeScript** (Advanced), **Python** (Advanced), **Java**, **C/C++**, **SQL** *Learning: C#, .NET / VB.Net*

Frontend & Backend: **React.js**, **Next.js**, **Node.js**, **FastAPI**, **REST API**, **GraphQL**, **HTML5**, **CSS3**, **Vite**

Architecture & Design: OOP, SOLID Principles, Design Patterns, Microservices, Distributed Systems, System Design, Scalability, API Design

Databases: **MySQL**, **SQLite**, **MongoDB** | Schema Design, Query Optimisation, Index Tuning, Query-Plan Analysis, Performance Profiling

Testing & Quality: Unit Testing, Integration Testing, Test-Driven Development (TDD), Automated Testing, Code Review, Postman, **CI/CD**, **Docker**

DevOps & Cloud: **Git / GitHub**, **Unix/Linux**, **Docker**, **Vercel**, **AWS** (Familiar), **WebRTC**, **TCP/IP**, **Slack API**

Process & CS Core: Agile / Scrum, SDLC, Data Structures & Algorithms, DBMS, Computer Networks, OS, Software Engineering, WCAG Accessibility

WORK EXPERIENCE

Acadia **Dec 2025 – Feb 2026**
Kolkata, India (Remote)
Software Engineer I (Fixed-Term Contract)

- Engineered & maintained 3 production backend microservices** applying **OOP**, **SOLID** principles, and **REST API** best practices, **lifting service uptime from 94% to 99.2%** and unblocking **4 downstream business teams** — eliminating a recurring blocker worth **~3 hrs/week** of lost productivity per team
- Championed** structured **code reviews** (as author and reviewer) and hardened the **CI/CD** pipeline with automated quality gates, **reducing post-release defects by 40%** and enabling **zero-downtime deployments** every **2-week Agile / Scrum** sprint
- Profiled & optimised 12 high-frequency SQL queries** via execution-plan analysis and targeted **index tuning**, **cutting average API response time by 35%**, surfacing **6 latent bottlenecks**; authored **technical documentation** for every shipped feature

Veritech Software IT Services PVT Ltd **May 2024 – July 2024**
Pune, Maharashtra
Software Engineer Intern

- Designed & delivered 4 production-ready full-stack features** across the full **SDLC** — requirements analysis, system design, implementation, unit & integration testing — driving a **15% uplift in user engagement** across **10,000+ daily active users**
- Partnered** within a **5-engineer Agile squad** to diagnose and resolve **30+ production bugs** with **clean, well-tested, peer-reviewed code**, **reducing Mean Time To Recovery (MTTR) by 25%** and eliminating **2 recurring P1 incidents** per sprint
- Re-architected MySQL** relational schemas for **3 high-volume modules** using query-plan analysis and strategic index design, **improving data retrieval speed by 20%**; produced test plans and **technical documentation** adopted as team standard

PROJECTS

Salon Assistant | **Python**, **FastAPI**, **SQLite**, **LiveKit**, **WebRTC**, **Docker** | [GitHub Project](#)

- Architected** a **production-grade AI customer support system** with a **FastAPI** microservice backend and human-in-the-loop escalation engine, **automating 70% of recurring inquiries** — zero agent intervention required for routine workflows
- Integrated LiveKit / WebRTC** real-time voice pipeline, **reducing average manual-handling time by 40%** vs. chat-only baseline; containerised full stack with **Docker** for environment-consistent, reproducible deployments
- Delivered** supervisor dashboard with complete ticket lifecycle (*Pending* → *In-Review* → *Resolved / Unresolved*), **cutting supervisor triage time by 50%**; applied **distributed systems** patterns throughout

Interactive Resume | **React.js**, **Vite**, **JavaScript ES6+**, **HTML5**, **CSS3**, **Vercel** | [GitHub Project](#)

- Shipped** a production full-stack web application with **JWT-style authentication**, skill-based filtering, and full-text search — deployed on **Vercel** with **99.9% uptime** and **zero production incidents post-launch**
- Achieved 95+ Google Lighthouse performance score** via code-splitting, lazy loading, and asset optimisation, holding total bundle under **150 KB** — top-tier web performance benchmark
- Engineered** modular **React** component system with Card / Table view modes and full **WCAG AA** accessibility compliance, cutting estimated future feature-addition effort by **60%**

Smart Customer Support Chatbot | **Java**, **Spring Boot**, **React.js**, **MongoDB**, **REST API**, **OpenAI** | [GitHub Project](#)

- Engineered** a **RAG-powered customer support platform** using **Spring Boot**, **React**, and **MongoDB**, delivering **sub-2s contextual responses** with source attribution, confidence scoring, and persistent chat sessions
- Optimized** multi-factor retrieval pipeline with keyword similarity ranking and top-K document selection, **improving answer relevance by 45%** while reducing redundant queries through indexed MongoDB storage and scalable REST APIs

EDUCATION

National Institute of Technology (NIT) Durgapur **Nov 2022 – Apr 2026**
Durgapur, West Bengal
Bachelor of Technology (B.Tech)

- Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Computer Networks, Database Management Systems (DBMS), Object-Oriented Design, Software Engineering, Distributed Systems, Computer Architecture
